

Smart building

Sigfox-enabled solutions address a wide range of use cases

What if a building could talk? Thanks to the Internet of Things, now it can. The latest suite of IoT solutions, powered by Sigfox's reliable network dedicated to the Internet of Things, takes the concept of smart buildings to a whole new level.

This next generation of Sigfox-enabled IoT solutions is lower-cost, autonomous and more flexible than earlier generations of connectivity technology. It's never been easier to gather real-time insights into infrastructure stability, rodent infestations, trash collection and more. Monitor building systems, track heavy equipment and secure valuable assets with wireless plug-and-play solutions that work well in both large and small buildings

Notification in case of smoke and fire

Back-up alarm systems

Collect consumption data effortlessly

Avoid rodent infestations

Ensuring defibrillators are ready for use

Let the trash talk

Just press the button to call for service

Monitor desk occupation

Monitor employee attendance remotely

Secure construction sites

About Sigfox

Sigfox is the world's leading service provider for the Internet of Things (IoT). The company has built a global network to connect billions of devices to the Internet while consuming as little energy as possible, as simply as possible.

Connected smoke detectors bring improved safety and service for facility managers

Connected smoke detectors are a must-have in smart buildings

Fire protection and fire safety are one of the most crucial aspects of a facility manager's business. Fail to detect or prevent a fire and you all but lose the contract. When facility management companies operate at several buildings across a wide geographical area, having smart fire safety devices is crucial in order to gain a clear picture of fire safety efforts at a glance.

Smoke detection

Temperature detection

Battery level detection

Battery removal warning

Condition updates

Data displayed on dashboard

Connected smoke detectors give facility managers exceptional visibility and unrivalled opportunities

Facility managers can use connected smoke alarms to increase building safety while improving their offering and their operational efficiencies.

Increase safety standards

Meet regulations

React faster

Decrease maintenance costs

Gain operational efficiencies
